

The Laboratory Safety Institute

Bring a Seminar to Your Organization!

A LSI Training Program Exclusively for Your Organization Makes Sense:

1. It's just for you

When you choose a *LSI Seminar everyone learns new skills at the same time*. You'll take home the resources needed to *understand the fundamentals of lab safety, to develop or improve your lab safety program, and comply with the OSHA Lab Standard*.

2. It's the best around

Since 1978, *LSI* has had the opportunity to work with nearly 65,000 science educators and scientists. Many have rated our training sessions as *the best they have ever attended*. The programs range from an hour to several days.

3. Presenter

The training programs are presented by one of LSI's highly qualified trainers. Each bring something different to the course and all are energetic and informative! For more information on any of our instructors please check out our website: <http://www.labsafetyinstitute.org/Instructors.html>
